

2023 INFORMATION

This programme is designed for teachers and is normally completed in two years part-time (up to five years). To achieve the Graduate Diploma of Information Technology in Education (GDITE) qualification, students must successfully complete the three compulsory modules and five optional modules.

COMPULSORY MODULES

Cloud-based Apps for Teaching and Learning

Students will gain an advanced understanding of a range of cloud based applications (e.g. Google Apps for Education, Evernote) and learn more about how this software can be used in their school and classroom to manage and engage their students in the learning process.

ICT and the Learning Process

Students will analyse theoretical learning perspectives in relation to using ICT for teaching and learning. They will examine and analyse a range of methods for effective teaching and learning in an ICT environment. Students will also identify a contemporary ICT issue in the New Zealand context, research this issue and present their findings. *NOTE: Those in an early childhood setting will complete **ICT and Early Childhood Education** in place of **ICT and the Learning Process**. Participants will analyse and reflect on the use of ICT in an ECE setting.*

Impact of ICT on Society

Students will explain the historical development of ICT by tracing its evolution in the New Zealand context. The impact of new technologies on various sectors of society will be examined. Ethical theory relating to ICT will be researched and analysed in the New Zealand school context.

ELECTIVE MODULES

Students are required to complete five elective modules from the list below:

- The Internet as an Educational Resource
- Using Digital Storytelling in the Classroom
- Coding Tools for the Classroom
- Using ePortfolios in the Classroom
- Using mLearning in the Classroom
- Special Topic
